## Installation Instructions

### Scene - Round and Square Mirrors

SC.590.600.66 & SC.590.800.66

SC.590.600x800.55

## Please Note

Please follow all instructions carefully. Failure to do so could invalidate your guarantee.

This product must be installed in accordance with all current wiring and building regulations by an appropriately qualified electrician. Appropriate circuit protection should be available for this product.

Please ensure that when fitted, the product is easily accessed for service and maintenance requirements. ARMERA cannot be held liable for costs associated with accessing the product after it is fitted.

## Installation

This product is IP44 rated and should be installed in Zone 2 or Outside Zone as shown in below diagram:

**Ensure all connections are turned off at the mains before starting installation or maintenance.**

1. Referring to the Zonal diagram on page 1 of these instructions, decide on the desired position to mount the mirror then mark out fixing points on the wall. Before drilling any holes, please make sure you are aware of the location of electrical wires or pipes that may sit behind the wall.

2. Use a suitable drill bit to drill holes then insert rawl plugs. The bracket can then be fixed to the wall with the screws. If mounting the product to plasterboard walls, appropriate fixings should be used.

3. Connect the electrical supply and ensure the mains supply remains switched off.

This product is manufactured to class 2 category and should be connected to the mains as shown here:

4. Mount the mirror onto the bracket

WEEE compliance

Must not be mixed with  
general household waste

5. Switch the mains electrical supply back on.

## Operation

The mirror has a demister pad and 3 lighting colour options (bright white, mid white and warm white).

If the sensor switch is not illuminated, a short press will turn on the lights around the sensor switch.

When the sensor switch is illuminated, the mirror lighting and demister can be controlled as follows:

**One press:** Mirror light and demister turn on – bright white.

**Press & hold:** Changes dim/brightness level.

**Double press:** Mirror light changes to mid white (demister stays on).

**Press & hold:** Changes dim/brightness level.

**Double press again:** Mirror light changes to warm white (demister stays on).

**Press & hold:** Changes dim/brightness level.

**One press when mirror lights are on:** Turns mirror light and demister off.

**Press and hold when mirror lights are off:** Turns sensor switch lights off.

The mirror remembers the last light setting (colour and level of brightness). Therefore, the next time you use the mirror, when sensor switch is illuminated:

**One press:** Light & demister turn on to the same lighting type and brightness that was last set.
